Fig.1 Disconnecting wiring harness from connection board and installing new connection board

- Use side-cutting pliers to cut off the wiring harness -2- approx. 6 cm (-A-) past the end of the insulation -1-.
- Strip the insulation from the ends of the wires and attach the wiring connectors contained in the repair kit. Use the wiring harness repair kit VAS 1978 for this purpose.

- Install the connectors -2- from the repair kit.
- Install the new connection board -1- with the appropriate switch (depending on colour; supplied with the repair kit).

———— 72-145 ————

- Install the cover -1-.
- Clamp the connector -3- between switch unit and panel.
- Clamp the wiring harness -2- into the groove on the switch unit.

Removing and installing fitting panels

1 – Fitting panels

◆ Removing

- Remove seat => Page 72-116
- Detach plastic lever for backrest release -8- in direction of arrow -A- using taped pliers.

Note:

The plastic tabs -6- on the fitting panel break off easily. If they are damaged during removal, the fitting panel must be replaced.

- Remove fitting panel -1- downwards so that pin -4- and tabs -5- disengage from its locking tabs -6- and -7-.
- Remove fitting panel -1- towards outside.
